

MATIAS ARAMAYO

FRONTEND DEVELOPER

Github: /maramayo95 | www.matiasaramayo.vercel.app

SUMMARY

Dynamic Frontend Developer specializing in React.js, Tailwind CSS, and modern web technologies. Expert in crafting responsive, visually appealing, and optimized user interfaces with a strong focus on improving key metrics such as Core Web Vitals. Skilled in API integration, real-time data handling, and implementing scalable frontend solutions. Successfully led the migration of a project to TypeScript, enhancing code quality and maintainability.

TECHNICAL SKILLS

- Reusable Component Architecture
- Service Layer Implementation
- External Library Integrations
- Responsive Layouts
- Core Web Vitals Optimization
- Code Debugging and Troubleshooting
- State Management (Context Api)
- TypeScript
- Tailwind CSS

PROFESSIONAL EXPERIENCE

Geco

May 2024 - Present

- Development and optimization of static websites using HTML, CSS, and jQuery, with a focus on improving performance (Core Web Vitals: LCP, FID, CLS).
- Creation of interactive marketing dashboards to display data from Facebook and Instagram campaigns, featuring charts, tables, and API integrations. Implemented preventive maintenance strategies.

Empleagro

Dec 2023 - Present

- Frontend Development: Designed the frontend architecture, managed global state with Context API, handled forms with React Hook Form, and implemented custom hooks for login screens and layout.
- Integration with Maps Library: Integrated a maps library to enhance user interaction and geolocation features within the portal.
- Migration to TypeScript: Led the migration to TypeScript, improving type safety and code maintainability across the project.

Simple Creative Studio

Nov 2023 - Present

- MVP Development: Created an MVP to capture backend data via forms and display it on a dashboard.
- Real-time Updates: Implemented real-time data updates with an intuitive frontend display.

EDUCATION

CAECE UNIVERSITY

Mar 2023 - Present

Undergraduate Program in Information Systems (2nd Year Student)

CODERHOUSE

Mar 2021 - Jul 2023

Fullstack Mern Developer Course
